Langmatz –

Our expertise for the networks of today and tomorrow

The specialist for technical system solutions

Langmatz technical system solutions are considered the gold standard of modern infrastructure in telecommunications and energy networks. Langmatz customers include energy providers, local councils, public utilities, and telecommunication companies.

“Made in Germany” is our guiding principle. One of our greatest strengths is that we carry out all processes at our sites in Germany. From design and development supported by the latest 3D printing technology, prototype and mould making, to production and installation.

Our quality management system (QMS) forms the daily basis for meeting our challenging goals. As standards are often not enough for us, we have evolved extensive testing processes and integrated special testing methods into our quality processes. These include regular checks in our material and product testing laboratory, which is equipped with a special static load hydraulic press for manholes.

The core elements of our corporate strategy include qualified employees, national supply chains, and manufacturing in Germany with state-of-the-art production facilities.

▲ Injection moulding machines

▲ Mould and tool making

▲ Product and materials testing laboratory

Ongoing digitalisation requires technologically mature systems for the networked city of today. We are one of the most innovative companies in Germany and, as such, we are the perfect partner to implement your projects.

One-stop shop – From development to delivery

With a wealth of innovative product developments over almost six decades, Langmatz is one of the leading industrial companies in plastic and metal processing. Our strength is that we map all product development processes at our sites. From design and development supported by the latest 3D printing technology, prototype and mould making, to production and installation.

We ensure the high quality of our products through our operational quality management as well as regular inspections in our materials and product testing laboratory, which is equipped with a special static load hydraulic press for manholes. Qualified employees, national supply chains and Made in Germany production with state-of-the-art production facilities are key factors in our success. The satisfaction of our customers is our top priority.

▲ Injection moulding

▲ Automated bending

▲ Welding robot

Your partner Langmatz – Individual system solutions from the German Alps

A fundamental structural transformation is taking place in towns, cities and rural areas. Digitalisation, climate protection and the energy and mobility transition require new concepts for a functional urban infrastructure in which people can enjoy their lives. This approach has given rise to the idea of the Smart City and the Smart Village – the vision of digitally networked environments.

Langmatz has looked into these requirements in detail and developed future-centric solutions for energy and data connectivity, as well as transport infrastructure. In doing so, we have placed great importance on ensuring that our systems boast a high level of security, can be integrated seamlessly into the townscape, and are particularly user-friendly.

We offer a broad-based portfolio of high-quality products for the many different requirements of the cities and towns of today and tomorrow:

- ▲ Polycarbonate manholes
- ▲ Underground distribution systems
- ▲ Outdoor cabinets and outdoor pedestals
- ▲ Building cable & pipe entry systems
- ▲ Fuse boxes
- ▲ Pedestrian signal requesting devices
- ▲ Radio ripple control receivers

From development to production – Ultimate end-to-end quality assurance

We develop innovative high-quality products in collaboration with our customers. To achieve this, we rely on state-of-the-art technology in our development work, including the use of the latest 3D printers. Langmatz has also established integrated end-to-end quality assurance processes extending from development to production. We therefore aim to continuously test our manholes to ensure that they meet all load classes. These complex tests are conducted in our Material and Product Test Laboratory, and start right from the development process. The findings acquired are incorporated into the production of every last element. Quality assurance of continuous manhole production is provided for by a daily, random 3-point bending test.

▲ Load class testing at Langmatz in Garmisch-Partenkirchen

▲ 3-point static load hydraulic press at Langmatz in Oberau

▲ Regular 3-point bending test every 2 hours

European approval for the complete Langmatz manhole system

The requirements governing the construction principles, testing, labelling, and quality control of manhole covers are regulated in DIN EN 124. A General Technical Approval (AbZ) is all that is required for approval of a manhole in Germany.

By contrast, Langmatz polycarbonate manholes are unique: the entire manhole system is tested, not just the cover. As our manholes comply with the load classes, we have an ETA (European Technical Assessment) which applies to all of our polycarbonate manholes with cover as per DIN EN 124 (B 125 and D 400). This confirms that all the test criteria have been met by Langmatz. That is why our manholes also carry the coveted CE mark.

FTTx product range –

From the distribution cabinet to the subscriber

Langmatz offers an integrated portfolio for the expansion of FTTx optical fibre networks from the distribution cabinet to the subscriber. Langmatz has been supplying systems for years. We make indoor and outdoor distribution systems, configured manhole systems, building cable & pipe entry systems and fibre termination points. We can provide a complete, customised solution for your FTTx optical fibre expansion.

Advantages:

- ▲ Coherent concept with coordinated products
- ▲ A wealth of expansion options based on customer requirements
- ▲ High-grade plastics and metals for long service life
- ▲ Compliance with the required IP degree of protection
- ▲ Infrastructure protection and monitoring systems

FTTx product overview – Solutions for optical fibre networks

Fibre distribution cabinets (FDC), above ground

Weather-resistant, easy-to-install fibre distribution cabinets for the expansion of modern optical fibre networks. The high-quality, recyclable polycarbonate provides optimum protection for different connection and network infrastructure components.

Building cable & pipe entry systems

Building cable & pipe entry systems equipped with the right sealing technology for all common masonry types – easy to install and always securely sealed.

Optical distribution and termination boxes (ONT)

Embedded in a durable polycarbonate cabinet with IP 54 degree of protection, they are designed for ease of installation, mounting, routing and commissioning of sophisticated optical fibre technology by users.

Polycarbonate manholes

A permanently durable and flexible alternative to concrete manholes, with many practical advantages. Polycarbonate 3D ribFrame technology is synonymous with excellent stability, load-bearing strength and durability. A wide range of sizes and equipment configurations provides for a wealth of uses.

Distribution systems with fibre enclosure, underground

Langmatz underground distribution systems are a future-proof solution to protect sensitive distribution systems for electricity, water and telecommunications from unauthorised access, vandalism, and flooding.

Fibre distribution cabinets (FDC), underground

Designed as a modern, concealed solution for the expansion of optical fibre networks, their flexible expansion options provide for the installation of a wide range of fibre enclosures, as well as their use as fibre distribution cabinets.

Outdoor cabinets –
Flexible expansion & high-quality material

Outdoor cabinets – Advantages of fibre distribution cabinets

Easy-to-install, secure and stable:

- ▲ Over 55 years of experience in plastic processing and design.
- ▲ Excellent strength values based on the use of the very highest quality materials.
- ▲ Maximum UV and weather resistance ensure durable use even in the most adverse conditions.
- ▲ Special optical fibre reinforcement prevents injuries caused by fraying glass fibres.
- ▲ Protection from the formation of condensation and good thermal insulating properties using special thermoplastic foam injection moulding.
- ▲ Precise adjustment to your requirements in the power engineering, telecommunication and traffic engineering sectors.
- ▲ Technologically mature products perfectly tailored to their purpose through continuous improvement.
- ▲ Permanent spare parts availability ensures cost-effective repairs to damaged cabinets.

Features of outdoor cabinets

- ▲ Degree of protection from IP43 to IP 54
- ▲ Swivel lever locking system for profile half-cylinder, as well as installation safeguards
- ▲ Polycarbonate finished in RAL 7038
- ▲ Green water-based coating available as an option
- ▲ Coating in RAL 7038 available as an option

Features of outdoor pedestals

- ▲ Designs from robust unmounted plug-in flat pack pedestals up to the all-rounder with predetermined breaking points and a whole host of technical features
- ▲ Removable front covers for excellent cable accessibility

Fibre distribution cabinets – Product overview

Designation	CDC type 22 FDC L 2.8	FDC M 2.6	FDC S 2.6
Fibre tray slots	144	72	36
Maximum splices	1728	864	432
Outlet	96 x Ø7/Ø10 mm 60 x Ø12 mm	48 x Ø7/Ø10 mm 48 x Ø12 mm	24 x Ø7/Ø10 mm 24 x Ø12 mm
Inlet	Standard: 4 x Ø6.5 – 20 mm Up to 12 x Ø6.5 – 20 mm	Standard: 4 x Ø6.5 – 20 mm Up to 8 x Ø6.5 – 20 mm	Standard: 4 x Ø6.5 – 20 mm Up to 8 x Ø6.5 – 20 mm

CDC type 22 FDC L 2.8 – Construction overview

- 1 Fibre tray management with mounting panel on housing doors with $2 \times 72 = 144$ fibre tray slots
- 2 Door with turning lever, prepared for one or two semi-profile cylinders
- 3 Strain relief and optional earthing point for optical fibre cables for up to $12 \times \text{Ø } 6.5 - 20$ mm, standard equipment: 4 x optical fibre cables. Core of fibre cable can be fitted on the rear panel of the cabinet or doors
- 4 Optimised position and improved micro cable organisation (standard) $\text{Ø } 2.5 - \text{Ø } 4$ mm
- 5 **NEW:** Adaptive cable and protective tube guidance for optimum guidance and protection when opening the door. Cable guide elements to open without complicated threading through
- 6 **NEW:** Door stay (opening angle 135°)
- 7 Cable diverter
- 8 Option to loop and store uncut bundled loose tube fibres / stowage of excess length of up to 6 m
- 9 Rear panel
- 10 **NEW:** Reinforced forced-entry protection by 7-point locking mechanism etc.
- 11 Use of commercially available micro-duct gas stops is possible
- 12 Universal micro-duct pipe management for $96 \times \text{Ø } 7 / \text{Ø } 10$ mm (Duo clamp provides for a possible mixture of $\text{Ø } 7$ and $\text{Ø } 10$ mm) or $60 \times \text{Ø } 12$ mm using Duo clamp
- 13 Duo strain-relief lug designed for $\text{Ø } 7$ mm / $\text{Ø } 10$ mm micro-duct pipes or $\text{Ø } 12$ mm strain-relief lug
- 14 Base plate for routing and sealing the micro-duct pipes and optical fibre cables, including organisation and individual strain relief of the micro-duct pipes
- 15 Strain relief is possible for micro-duct pipe bundles and inlet cables using U-clamps
- 16 Outdoor pedestal EK265/65 with predetermined breaking point
- 17 Detailed image: optical fibre cable bridge between the rows of E&MMS splice fibre trays
- 18 Detailed image: end piece with routing option for optical fibres
- 19 Detailed image: protective cover for tray section

CDC type 22 FDC L 2.8 – Fibre distribution cabinet

All Langmatz fibre distribution cabinets can be used for Gigabit Passive Optical Network (GPON) and for Point to Point-Ethernet (PtP) technology in optical fibre access networks.

The fibre distribution cabinet CDC type 22 FDC L 2.8 is a veritable all-rounder in our product range. Installation is simple, as the two separate areas for the optical fibre cassettes and the micro-duct pipes are very easy to access. The inside of the door contains the fibre tray system for single and multiple fibre management to distribute and store the optical fibres from the central office to the networked buildings. The inside of the fibre distribution cabinet contains the micro-duct pipe management system for the organised storage of the micro-duct pipes and the entry port and strain relief of the optical fibre main cable from the central office.

The outgoing micro-duct pipes are held securely in the combination of base plate, Duo clamps and strain relief lugs. They are either designed for $\varnothing 7 / 10$ mm or $\varnothing 12$ mm. The insertion aid enables the micro-duct pipes to be installed quickly and easily.

The outgoing micro cables can be ideally inserted, as the micro-duct pipes can be easily removed from the Duo clamps and so guarantee simple access. Optical fibre cables in micro-duct pipes as well as cables that can be buried underground can be inserted and held in the fibre distribution cabinet in the access area on the left. Just above this is an option to store excess lengths of unused or uncut bundled loose tube fibres (loop function).

Fulfils the criteria of the German National Broadband Funding Programme.

CDC type 22 FDC L 2.8

- ▲ 96 x micro-duct pipes with $\varnothing 7$ mm or $\varnothing 10$ mm and 96 x optical fibre micro cables with $\varnothing 1.3 - \varnothing 4.0$ mm
- ▲ 60 x micro-duct pipes with $\varnothing 12$ mm and 60 x optical fibre micro cables with $\varnothing 1.3 - \varnothing 4.0$ mm
- ▲ Universal micro cable organiser for $\varnothing 2.5 - \varnothing 4.0$ mm
- ▲ Optimised cable routing from the cabinet to the doors and simple reconfiguration of additional cables until fully loaded
- ▲ Strain relief for the strength members of the inlet cables on the rear panel of the cabinet or doors is possible
- ▲ Insertion and mounting aid for the simplified insertion of the micro-duct pipes through the sealing plate
- ▲ Up to 12 x micro-duct pipes and mini cables are possible in the access area
- ▲ Improved micro cable routing, thanks to the optimised position of the micro cable organiser

▲ CDC type 22 FDC L 2.8 with pedestal cover without splice cover

▲ CDC type 22 FDC L 2.8 without pedestal cover with splice cover

Expansion of fibre distribution cabinets

▲ Access area:

- Micro-duct pipe/mini cable inlet with fixing and strain relief for up to 12 x micro-duct pipes \varnothing 6.5 – 20 mm and associated optical fibre cables of up to max. \varnothing 10 mm is possible (standard: 4 x micro-duct pipes or mini cables)
- Strain relief for the optical fibre cables on the rear panel on the cabinet or door side
- Optimised mini cable routing throughout, from entry port, sealing and strain relief to the splice section
- Base plate for routing and sealing the micro-duct pipes and optical fibre cables
- Organisation and individual strain relief of the micro-duct pipes
- Option to loop and store uncut bundled loose tube fibres
- Option to store up to 6 m excess bundled loose tube fibres

▲ Outlet area:

- Micro cable organiser for different diameters:
 - 1.3 mm
 - 1.8 mm
 - 2.5 mm
 - 2.8 – 3.0 mm
 - 3.5 mm
 - 3.8 – 4.00 mm
 - 2.5 – 4.0 mm
- Micro-duct pipe capacity for 96 x \varnothing 7 mm / 96 x \varnothing 10 mm using the Duo clamp organiser or 60 x \varnothing 12 mm
- Micro-duct pipe management system with DUO strain-relief lugs (\varnothing 7 mm and \varnothing 10 mm) or strain-relief lug (\varnothing 12 mm) for the tool-free organisation and fixing of the outgoing micro-duct pipes
- Use of commercially available micro-duct gas stops is possible

▲ Optical fibre installation kit:

- Mounting panel equipped with organiser modules to accommodate E&MMS fibre tray system
- Fibre tray slots for up to 144 splice fibre trays (5 mm) (maximum of 1728 splices) or up to 72 splice fibre trays (10 mm)
- Simple configuration of the splice fibre trays and tool-free replacement is possible
- Protective cover for the splice fibre tray area

Advantages of outdoor cabinets

- ▲ Outdoor cabinet made of modified polycarbonate (PC)
- ▲ UV- and weather-resistant, self-extinguishing, environmentally friendly and recyclable
- ▲ Housing with:
 - Door with turning lever, prepared for one or two semi-profile cylinders
 - Good access for installation and operation
 - Ribbing to prevent poster sticking
 - Forced-entry protection safety level according to DIN 47609: T3
 - Cable routing into the pedestal from all four sides
 - Pedestal with predetermined breaking point (load: >1,500 N)

▲ Door with fibre management

▲ Inlet and outlet area of the micro-duct pipes on the right of the housing with fibre routing on the left

▲ Pedestal with open cover and micro-duct pipes fitted

▲ CDC type 22 FDC L 2.8

Technical data

Designation	CDC type 22 FDC L 2.8
Dimensions	Height including pedestal: 2110 mm, width 775 mm, depth 340 mm (with turning handle max. 370 mm)
Weight	Approx. 72 kg empty (pedestal: approx. 19 kg and cabinet top part approx. 53 kg)
Material	Polycarbonate (PC)
Colour	RAL 7038
Protection rating	IP 54
Safety level for forced-entry protection (based on DIN 47609)	T3

Dimensions

▲ Dimensions in mm

Construction

Accessories

- ▲ Labelling plate for the funded configuration
- ▲ E&MMS fibre tray system for single and multiple-fibre management (pack of 6 or 20)
 - Management of up to 12 splices per fibre tray
- ▲ Optical splitter / coupler
 - Available in different configurations and suitable for many applications
- ▲ Various sizes of strain-relief lugs and micro cable organisers
- ▲ Strain relief for the access area, mini cable no. 5 – 12

▲ E&MMS fibre tray

▲ Labelling plate

CDC type 22 FDC L 2.8
96 x Ø 7/10 mm micro-duct pipes Ø 2.5 – 4.0 mm micro cables

Item no.
062450500/500

Base plates /
cable fastening

▲ Inlet for (micro-duct pipes / micro cables with fixing and strain relief):

- 4 x micro-duct pipes for Ø 10 – 20 mm (standard), extendible to 12 x micro-duct pipes or 4 x mini cables for Ø 6.5 – 10 mm
- 4-fold core of fibre cable strain relief for mini cables Ø 6.5 – 10 mm on the door
- 4-fold core of fibre cable strain relief on the rear panel
- Loop duct
- Excess length storage available
- U-clamps: 2 x B12 and 1 x BK14

▲ Outlet for (micro-duct pipe fixing and strain relief):

- Micro cable organiser for Ø 2.5 – Ø 4.0 mm
- 96 micro-duct pipes Ø 7 mm or Ø 10 mm
- Duo strain-relief lugs 96 x Ø 7 / 10 mm

Locking mechanism: Turning lever for 2 x profile half-cylinders

Special accessories: Fastening and strain relief for inlets 5 – 12

CDC type 22 FDC L 2.8
60 x Ø 12 mm micro-duct pipes Ø 2.5 – 4.0 mm micro cables

Item no.
062450520/500

Base plates /
cable fastening

▲ Inlet for (micro-duct pipes / micro cables with fixing and strain relief):

- 4 x micro-duct pipes for Ø 10 – 20 mm (standard), extendible to 12 x micro-duct pipes or 4 x mini cables for Ø 6.5 – 10 mm
- 4-fold core of fibre cable strain relief for mini cables Ø 6.5 – Ø 10 mm on the door
- 4-fold core of fibre cable strain relief on the rear panel
- Loop duct
- Excess length storage available
- U-clamps: 2 x B12 and 1 x BK14

▲ Outlet for (micro-duct pipe organiser and strain relief):

- Micro cable organiser for Ø 2.5 – Ø 4.0 mm
- 60 micro-duct pipes Ø 12 mm
- Strain-relief lugs 60 x Ø 12 mm
- Locking mechanism: Turning lever for 2 x profile half-cylinders
- Special accessories: Fastening and strain relief for inlets 5 – 12

Outdoor pedestal EK265 2.0 – For FDC L

With 30 years of experience as a system supplier for outdoor cabinets and outdoor pedestals, Langmatz is a competent and reliable partner. The use of polycarbonate ensures high mechanical strength and lifelong weather

resistance. Langmatz recycles using an especially developed process and thus supports a sustainable use of resources.

Advantages

- ▲ A defined predetermined breaking point prevents cost-intensive excavation, asphaltting or pavement work in the event of accident damage
- ▲ Option to restore the predetermined breaking point
- ▲ Cable/pipe bundle can be inserted from all sides
- ▲ Vertical separation feature enables the pedestal to be installed over existing cables
- ▲ Integrated strain relief rails
- ▲ Tested and approved to Deutsche Telekom guidelines
- ▲ Enlarged inlet space
- ▲ Fast, easy installation

Technical data

Designation	Outdoor pedestal EK265 2.0
Material	Polycarbonate (PC)
Dimensions W x H x D	754 x 1060 x 310 mm
Housing colour	RAL 7038
Defined predetermined breaking point	Included
Use	FDC L CDC type 82 CDC type 22

Predetermined breaking point function and retrofit kit

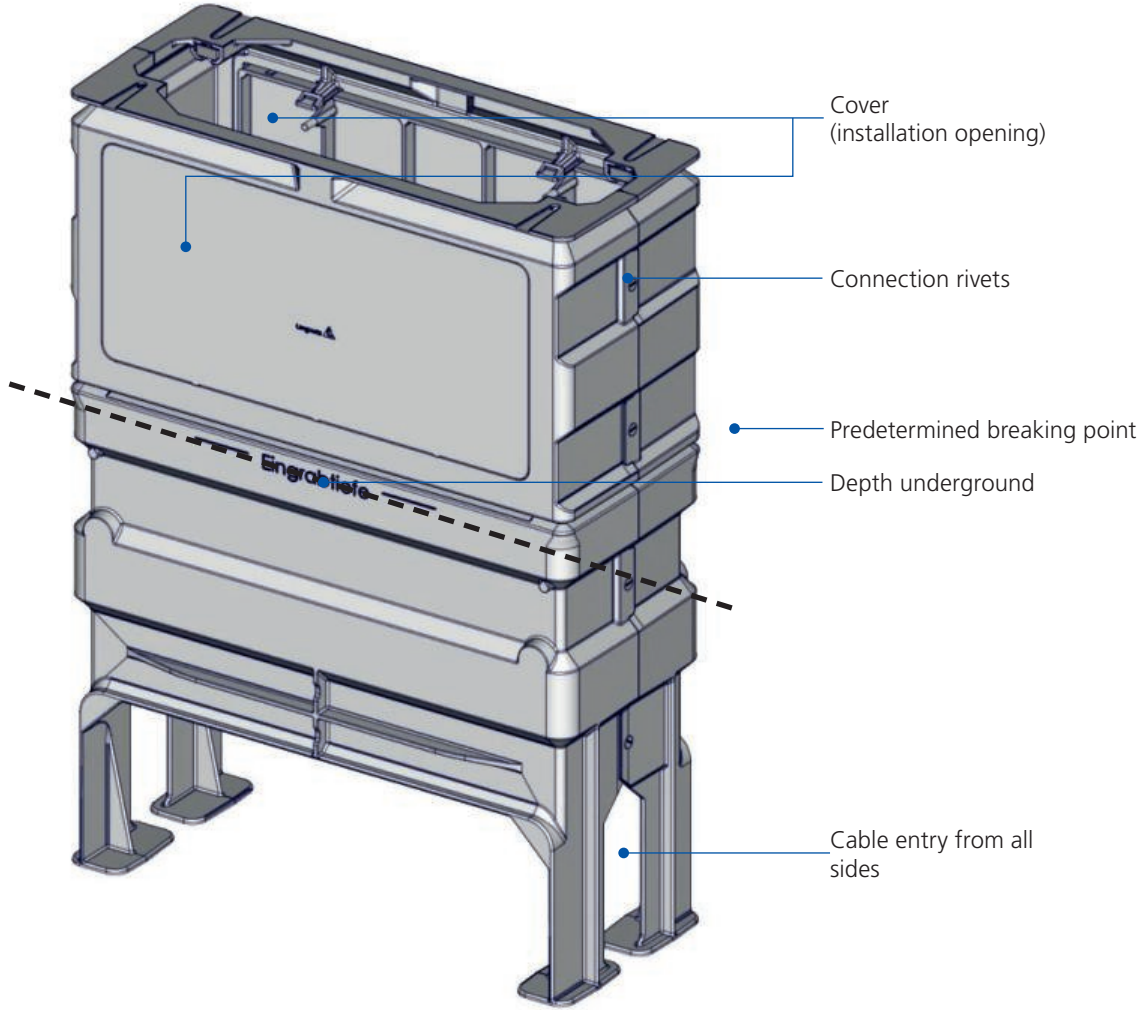

▲ Restored predetermined breaking point in the pedestal

▲ Restored predetermined breaking point in the pedestal
Predetermined breaking point set art. no.: 700879910/002

Construction of the outdoor pedestal

▲ Outdoor pedestal EK265 2.0 Art. no.: 062650130/000

FDC M 2.6 – Fibre distribution cabinet

All Langmatz fibre distribution cabinets can be used for Gigabit Passive Optical Network (GPON) and for Point to Point-Ethernet (PtP) technology in optical fibre access networks.

The extremely compact design of the fibre distribution cabinet M 2.6 simply sets it apart. It was developed as a cost-optimised solution for situations with limited space to provide fast optical fibre connections in residential areas. The outgoing micro-duct pipes are held securely in the combination of base plate, Duo clamps and strain relief lugs. They are either designed for $\varnothing 7 / 10$ mm or $\varnothing 12$ mm. The insertion aid enables the micro-duct pipes to be installed quickly and easily.

The outgoing micro cables can be ideally inserted, as the micro-duct pipes can be easily removed from the Duo clamps and so guarantee simple access. Optical fibre cables in micro-duct pipes as well as cables that can be buried underground can be inserted and held in the fibre distribution cabinet in the access area on the left. Just above this is an option to store excess lengths of unused or uncut bundled loose tube fibres (loop function).

The fibre distribution cabinet consists of a complete housing with base plate and pedestal and is available in a series of extension versions.

The FDC M 2.6 meets the criteria of Germany's National Broadband Funding Programme.

▲ FDC M 2.6 open

Advantages of the FDC M 2.6

- ▲ 48 x micro-duct pipes with $\varnothing 7$ mm or $\varnothing 10$ mm and 48 x optical fibre micro cables with $\varnothing 1.3$ mm – $\varnothing 4.0$ mm
- ▲ 48 x micro-duct pipes with $\varnothing 12$ mm and 48 x optical fibre micro cables with $\varnothing 1.3$ mm – $\varnothing 4.0$ mm
- ▲ Component for the micro cable organiser for $\varnothing 2.5$ – $\varnothing 4.0$ mm
- ▲ Insertion aid for the simplified insertion of the micro-duct pipes through the sealing plate
- ▲ Up to 8 x micro-duct pipes and mini cables are possible in the access area (standard: 4 x)
- ▲ Improved micro cable routing, thanks to the optimised position of the micro cable organiser

▲ FDC M 2.6 open without pedestal cover

Expansion of fibre distribution cabinets

▲ Access area:

- Micro-duct pipe/mini cable access with fixing and strain relief for up to 8 x micro-duct pipes \varnothing 6.5 – 20 mm and associated mini cables up to max. \varnothing 10 mm (standard: 4 x micro-duct pipes or optical fibre cables)
- Optimised micro cable routing throughout, from entry port, sealing and strain relief to the splice section
- Base plate for routing and sealing the micro-duct pipes and optical fibre cables, including organisation and individual strain relief of the micro-duct pipes
- Possible looping and stowage of uncut bundled loose tube fibres / stowage of excess length of up to 6 m

▲ Outlet area:

- Micro cable organiser for different diameters:
 - 1.3 mm
 - 1.8 mm
 - 2.5 mm
 - 2.8 – 3.0 mm
 - 3.5 mm
 - 3.8 – 4.0 mm
 - 2.5 – 4.0 mm
- Micro-duct pipe capacity for 48 x \varnothing 7 mm / 48 x \varnothing 10 mm using the Duo clamp organiser or 48 x \varnothing 12 mm
- Micro-duct pipe management system with DUO strain-relief lugs (\varnothing 7 mm and \varnothing 10 mm) or strain-relief lug (\varnothing 12 mm) for the tool-free organisation and fixing of the outgoing micro-duct pipes
- Use of commercially available micro-duct gas stops is possible

▲ Optical fibre installation kit:

- Mounting panel equipped with organiser modules to accommodate E&MMS fibre tray system
- Fibre tray slots for up to 72 E&MMS splice fibre trays (5 mm) (maximum of 864 splices) or up to 36 splice fibre trays (10 mm)
- Simple configuration of the splice fibre trays and tool-free replacement is possible
- Protective cover for the splice fibre tray area

Advantages of outdoor cabinets

- ▲ Outdoor cabinet made of modified polycarbonate (PC)
- ▲ UV- and weather-resistant, self-extinguishing, environmentally friendly and recyclable
- ▲ Front cover with:
 - Turning lever closing mechanism prepared for two profile half-cylinders
 - Angled so that the cabinet cannot be used as a climbing aid
 - Good access for installation and operation
 - Ribbing to prevent poster sticking

▲ FDC M 2.6 open without pedestal cover

▲ FDC M 2.6 closed

Technical data

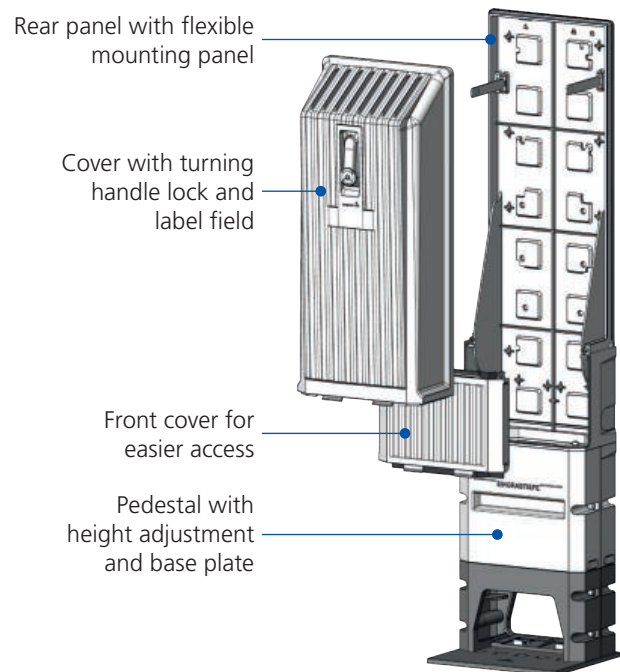

Designation	FDC M 2.6
Dimensions	Height including pedestal: 2003 mm – 2103 mm Width 454 mm Depth 273 mm (with turning handle max. 282 mm)
Weight	Approx. 49 kg empty
Material	Polycarbonate (PC)
Colour	RAL 7038
Protection rating	IP 54
Forced-entry protection	tested to RC2 DIN EN 1627

Dimensions

▲ Dimensions in mm (*due to maximum height adjustment)

Construction

Accessories

- ▲ Labelling plate for the funded configuration
- ▲ E&MMS fibre tray system for single and multiple-fibre management
 - Management of up to 12 splices per fibre tray
- ▲ Optical splitter / coupler
 - Available in different configurations and suitable for many applications
- ▲ Various sizes of strain-relief lugs and micro cable organisers
- ▲ Strain relief bracket for the access area, optical fibre cable no. 5 – 8 (loop option available)

▲ E&MMS fibre tray

▲ Labelling plate

FDC M 2.6
48 x Ø 7 mm or 10 mm micro-duct pipes Ø 2.5 – 4 mm micro cables

Art. no.:
064304002

Base plates / cable fastening

▲ **Inlet for (micro-duct pipes / micro cables with fixing and strain relief):**

- 4 x micro-duct pipes for Ø 10 – 20 mm (standard), extendible to 8 x micro-duct pipes or 4 x mini cables for Ø 6.5 – 10 mm
- 4 x clamping yokes on mounting panel for central core strain relief
- Loop duct
- Excess length storage available

▲ **Outlet for (duo micro-duct pipe organiser and strain relief):**

- Micro cable organiser for Ø 2.5 – 4 mm
- Duo strain-relief lugs 48 x Ø 7 / 10 mm for micro-duct pipes

Locking mechanism: Turning lever for 2 x profile half-cylinders

▲ **Special accessories:**

- Assembly kit: Extension of strain relief 5 – 8 (inlet)
- Earthing assembly

FDC M 2.6
48 x Ø 12 mm micro-duct pipes Ø 2.5 – 4 mm micro cables

Art. no.:
064304003

Base plates / cable fastening

▲ **Inlet for (micro-duct pipes / mini cables with fixing and strain relief):**

- 4 x micro-duct pipes for Ø 10 – 20 mm (standard), extendible to 8 x micro-duct pipes or 4 x mini cables for Ø 6.5 – 10 mm
- 4 x clamping yokes on mounting panel for central core strain relief
- Loop duct
- Excess length storage available

▲ **Outlet for (duo micro-duct pipe organiser and strain relief):**

- Micro cable organiser for Ø 2.5 – 4 mm
- Strain-relief lugs 48 x Ø 12 mm for micro-duct pipes

Locking mechanism: Turning lever for 2 x profile half-cylinders

▲ **Special accessories:**

- Assembly kit: Extension of strain relief 5 – 8 (inlet)
- Earthing assembly

FDC S 2.6 – Fibre distribution cabinet

All Langmatz fibre distribution cabinets (FDC) can be used for Passive Optical Network (PON) and for Point to Point-Ethernet (PtP) technology in the optical fibre access network.

The FDC S 2.6 was designed for use in suburbs and rural areas in which the network connection of single-family homes and apartment buildings is primarily planned. The fibre distribution cabinet is designed for 24 micro-duct pipes with a diameter of 7 mm, 10 mm or 12 mm. DUO clamps and DUO strain relief lugs can be used to accommodate a mixture of diameters.

The outgoing micro-duct pipes are held securely in the combination of base plate, Duo clamps and strain relief lugs. They are either designed for 7/10 mm or 12 mm. The insertion aid enables the micro-duct pipes to be installed quickly and easily.

The outgoing micro cables can be ideally inserted, as the micro-duct pipes can be easily removed from the Duo clamps and so guarantee simple access. Optical fibre cables in micro-duct pipes as well as cables that can be buried underground can be inserted and held in the fibre distribution cabinet in the access area on the left. Just above this is an option to store excess lengths of unused or uncut bundled loose tube fibres (loop function).

The FDC S 2.6 meets the criteria of Germany's National Broadband Funding Programme.

Advantages of the FDC S 2.6

- ▲ 24 x micro-duct pipes with \varnothing 7 mm or \varnothing 10 mm and 24 x optical fibre micro cables with \varnothing 1.3 mm to \varnothing 4.0 mm
- ▲ 24 x micro-duct pipes with \varnothing 12 mm and 24 x optical fibre micro cables with \varnothing 1.3 mm to \varnothing 4.0 mm
- ▲ Component for the micro cable organiser for \varnothing 2.5 – \varnothing 4.0 mm
- ▲ Insertion aid for the simplified insertion of the micro-duct pipes through the sealing plate
- ▲ Up to 8 x micro-duct pipes and mini cables are possible in the access area (standard = 4)
- ▲ Improved micro cable routing, thanks to the optimised position of the micro cable organiser

▲ FDC S 2.6 without cover with open cabinet cover

▲ FDC S 2.6 without cover

▲ **Access area:**

- Micro-duct pipe/mini cable access with fixing and strain relief for up to 8 x micro-duct pipes \varnothing 6.5 – 20 mm and associated mini cables up to max. \varnothing 10 mm (standard: 4 x micro-duct pipes or mini cables)
- Optimised micro cable routing throughout, from entry port, sealing and strain relief to the splice section
- Base plate for routing and sealing the micro-duct pipes and optical fibre cables, including organisation and individual strain relief of the micro-duct pipes
- Possible looping and stowage of uncut bundled loose tube fibres / stowage of excess length of up to 6 m

▲ **Outlet area:**

- Micro cable organiser for different diameters:
 - 1.3 mm
 - 1.8 mm
 - 2.5 mm
 - 2.8 – 3.0 mm
 - 3.5 mm
 - 3.8 – 4.00 mm
 - 2.5 – 4.0 mm
- Micro-duct pipe capacity for 24 x \varnothing 7 mm / 24 x \varnothing 10 mm using the Duo clamp organiser or 24 x \varnothing 12 mm
- Micro-duct pipe management system with DUO strain-relief lugs (\varnothing 7 mm and \varnothing 10 mm) or strain-relief lug (\varnothing 12 mm) for the tool-free organisation and fixing of the outgoing micro-duct pipes
- Use of commercially available micro-duct gas stops is possible

▲ **Optical fibre installation kit:**

- Mounting panel equipped with organiser modules to accommodate E&MMS fibre tray system
- Fibre tray slots for up to 36 E&MMS splice fibre trays (5 mm) (maximum of 432 splices) or up to 18 splice fibre trays (10 mm)
- Simple configuration of the splice fibre trays and tool-free replacement is possible
- Protective cover for the splice fibre tray area

Advantages of outdoor cabinets

- ▲ Outdoor cabinet made of modified polycarbonate (PC)
- ▲ UV- and weather-resistant, self-extinguishing, environmentally friendly and recyclable
- ▲ Front cover with:
 - Turning lever closing mechanism prepared for two profile half-cylinders
 - Good access for installation and operation
 - Ribbing to prevent poster sticking

▲ FDC S 2.6 open

▲ FDC S 2.6 closed

Technical data

Designation	FDC S 2.6
Dimensions	Height including pedestal: 1635 mm, width 308 mm Depth 215 mm (with turning lever max. 248 mm)
Weight	Approx. 24 kg
Material	Polycarbonate (PC)
Colour	RAL 7038
Protection rating	IP 54
Forced-entry protection	tested to RC2 DIN EN 1627

Construction

Accessories

- ▲ Labelling plate for the funded configuration
- ▲ Fibre tray system for single and multiple-fibre management
 - Management of up to 12 splices per fibre tray
- ▲ Optical splitter/coupler
 - Available in different configurations and suitable for many applications
- ▲ Various sizes of strain-relief lugs and micro cable organisers
- ▲ Strain relief bracket for the access area, mini cable no. 5 – 8 (loop option is available)

▲ E&MMS fibre tray

▲ Labelling plate

Distribution

FDC XS 2.6 – Fibre distribution cabinet

The XS fibre distribution cabinet was designed for universal use as an outdoor optical fibre distribution system for FTTH/B expansion areas to enable optical fibre connections to be rapidly provided in remote areas as well. It is a proven small cabinet that also blends perfectly into the townscape or cityscape.

Benefits of Langmatz fibre distribution cabinets

▲ Uses

- Designed for Gigabit Passive Optical Network (GPON) and Point to Point-Ethernet (PtP) technology in optical fibre access networks

▲ Flexibility down to the last detail

- New component for micro cable organisation: 6 x OF cables with \varnothing 2.5 – 4.0 mm
- Various micro-duct pipe diameters both in the inlet and also in the outlet

▲ Stability, security and safety – during installation and in operation

- Strain relief option for the OF cable in the inlet area
- Improved micro cable routing, thanks to the optimised position of the micro cable organiser
- Ultra-compact design
- Excellent UV and weather resistance

Expansion options for fibre distribution cabinets

▲ Inlet area

- Micro-duct pipe / cable inlet with fixing and strain relief for 1 x micro-duct pipe with \varnothing 7, 10 or 12 mm and associated OF cables
- Optimised micro cable routing throughout, from the entry port to the splice section
- Base plate for routing and sealing the micro-duct pipes and optical fibre cables, including organisation and individual strain relief of the micro-duct pipes

▲ Outlet area

- Organisation of micro cables with \varnothing 2.5 – 4.0 mm
- Micro-duct pipe capacity for 6x \varnothing 7 mm / 6x \varnothing 10 mm
- Micro-duct pipe management system with DUO strain-relief lugs (\varnothing 7 mm and 10 mm) for the tool-free organisation and fixing of outgoing micro-duct pipes
- Use of commercially available micro-duct gas stops is possible

▲ Optical fibre installation kit

- Mounting panel equipped with an organiser module to accommodate up to six E&MMS fibre tray systems
- Fibre tray slots for up to 6 E&MMS splice fibre trays with 5 mm (maximum 36 splices) or up to 3 splice fibre trays with 10 mm
- Simple configuration of the splice fibre trays and tool-free replacement is possible

Optical fibre building cable & pipe entry system

Maximum possible safety

Optical fibre building cable & pipe entry system – Together we are bringing high-speed internet into every home

The internet is an essential part of our everyday life; it is literally our gateway to the world. It is therefore clear that the internet connection of the future must be fast, modern and reliable. Builders, however, expect not only maximum

performance, but also an affordable solution. You cannot go wrong with our optical fibre building cable & pipe entry system: we offer an uncompromising and economical solution.

Whether with or without a cellar, constructed in concrete, bricks or hollow blocks.

When faced with the challenge of finding an answer to every developer's requirement, you will find that we have the perfect solution for every eventuality. We also supply the right sealing technology for all common masonry – easy to install and always securely sealed.

DIN 18533 – The new requirements for optical fibre entry ports.

We build on proven technology with our new generation of optical fibre entry ports while simultaneously setting new standards in terms of safety and flexibility. If nothing else, the advantages of our proven resin injection system are convincing: no matter in which wall, the building cable & pipe entry systems always fit and seal reliably. Our VarioPipe® optical fibre building cable & pipe entry system meets all the building sealing requirements of DIN 18533. Thanks to its movable flange, it can even be used for inclined installation and without restoring the external sealing (plastic-modified bitumen coating/PMBC) applied. Added to this is its space-saving design, which makes the VarioPipe optical fibre building cable & pipe entry system suitable for all wall thicknesses from 200 mm. All that is needed for installation is a hole measuring Ø 25 – 26 mm and a minimal foundation pit. The advantage for you: lower costs for civil engineering work.

EK459 VarioPipe – Optical fibre building cable & pipe entry system

The VarioPipe optical fibre building cable & pipe entry system was developed specifically for the insertion of micro-duct pipes into buildings and through building walls to connect subscribers to the optical fibre network. The building cable & pipe entry system can also be used with other media cables, such as copper telecommunication cables or oval cables, and is suitable for all common wall types, including waterproof concrete, bricks or hollow blocks. The foam-fill principle along the drill channel and the media cable guarantees absolute seal tightness.

Advantages

▲ Outstanding flexibility

- Horizontal or inclined installation up to 45°(continuous)
- Quick and easy installation in just a few minutes
- Secure hold of the foam pipe in the hole thanks to clamping ribs
- Optimum distribution of the sealing foam in any situation
- Inexpensive installation thanks to minimal foundation pit at the external wall
- Suitable for all wall thicknesses from 200 mm
- Moulded dust protection cap for different diameters

▲ Maximum possible safety

- Meets the requirements of the new DIN 18533
- Reliable sealing through expanding 2-component resin
- Sealing prevents foam from escaping on inside of building
- Secure hold of the foam pipe in the hole thanks to clamping ribs
- Inner bend radius limit R60 (mm) with fastener for different diameters
- Gas- and water-pressure-tight up to 1 bar according to DIN 18533 W1.1-E, W1.2-E, W2.1-E
- Waterproof concrete stress class 1 (DAfStb 2017)
- Waterproof concrete stress class 2 (DAfStb 2017)

Optical distribution and termination boxes

Simple optical fibre management

Optical distribution and termination boxes – Easy to install and flexible down to the last detail

Langmatz now has a selection of optical distribution and termination boxes (ONT) in different sizes and with different features in its product range to provide system solutions for FTTB/H optical fibre expansion. The components form fundamental elements of the optical fibre architecture as they connect the network provider's cable to the building network at the building entry point. Langmatz optical distribution and termination boxes are accommodated in a sturdy and protected polycarbonate housing with IP 54 degree of protection. They are suitable for the transition to customer networks, for single-family homes or

multiple-family dwellings as well as for companies, and can be used with plug connections, fusion splice connections and couplers.

They are designed for the easy installation, mounting, routing and commissioning of sophisticated optical fibre technology for users. Great emphasis has also been placed by Langmatz on excellent flexibility down to the last detail. Langmatz optical distribution and termination boxes are quality products that combine innovative as well as proven and tested features.

Advantages

- ▲ Ease of handling and simple installation
- ▲ Sturdy polycarbonate housing (IP 43 - IP54 degree of protection)
- ▲ Fibre management by a guide in the housing, in the splice fibre tray or on the mounting panel
- ▲ Protected area for safe connection and cable management
- ▲ Bending radii maintained using predefined fibre guides
- ▲ Outlet cable protected by silicone seal
- ▲ Coupler replacement during ongoing operation
- ▲ Approved and eligible for Germany's National Broadband Funding Programme

Uses

- ▲ Transition to the customer's network
- ▲ Single-family home/multiple-family dwelling and/or corporate
- ▲ Can be used for a plug connection, fusion splice and coupler
- ▲ Optical distribution and termination box
- ▲ Optical fibre subscriber connection

ONT size S –

Optical distribution and termination box / Subscriber junction box

The Langmatz ONT size S optical distribution and termination box is a quality product that combines innovative as well as proven and tested features. It provides for easy optical fibre management in a robust and protected polycarbonate housing. It is impressively easy to handle and install, and also meets the high quality standards required for housing, laying, and commissioning sophisticated optical fibre technology.

Advantages

▲ Flexibility down to the last detail

- Multifunctional optical fibre building entry point (network layer 3 termination box) and subscriber connection (network layer 4 subscriber junction box)
- Ø 5, 7 and 10 mm cable/micro-duct pipe inlet/outlet
- Integrated mounting area for fibre management and coupler/splice protection management
- Slot for 3+2 LC duplex couplers or 2 SC simplex couplers
- Accommodates micro-duct gas stops for micro-duct pipes
- Installation/commissioning/service without the need for special tools
- Various locking mechanism options for the cabinet, with sealing option

▲ Eligible for German government aid for single-family houses and semi-detached houses

- Requirements: Fully populated with couplers (3 LC duplex couplers for single-family houses, 5 LC duplex couplers for semi-detached houses)

▲ Stability and safety – during installation and in operation

- Fibre management with protected, secure fibre routing
- Protected area for safe connection and cable management
- Minimum bending radii maintained using predefined fibre guides
- Coupler replacement during ongoing operation

▲ Uses

- Transition to the customer's network
- Single-family houses, semi-detached houses and corporate clients
- Can be used for a plug connection, fusion splice
- Optical distribution and termination box
- Optical fibre subscriber termination box
- External/internal cable conversion
- Surface-mounted installation on a cavity wall or 60 mm flush-mounted boxes

Technical data

Designation	ONT size S
Dimensions W x H x D	94 x 130 x 25 mm
Weight	Approx. 0.15 kg
Cabinet material	Polycarbonate (PC)
Housing colour	RAL 9016 Traffic white
Optical fibre cables / micro-duct pipes	Inlet/outlet: 1 x Ø 5, 7, 10 mm and 2 x Ø 5, 7 mm
Closing mechanism	Sealable, Torx/Phillips-head screw, seal sticker
Mounting panel	With management of 12 crimp splice protectors, bending radius limiter and fibre retainers
Splice protection management	12 x crimp splice protection management
Coupler section	<ul style="list-style-type: none"> ▲ ONT: 5 x LC duplex couplers Optical fibre subscriber junction box: 3 x LC duplex couplers 3 x SC simplex couplers ▲ Cable outlet (without connector) with strain relief options
Temperature range	-33° to 70°C
Protection rating	IP 43
Degree of shock resistance	IK 06
Quality features	<p>Pigtails/couplers LC, SC APC (green)</p> <p>Ferrule: ceramic, zirconia</p> <p>Fibre type: single-mode ITU-T, G.657A, grade B, E9/125 900 µ</p> <p>Optical parameters of plug connection for 1,310 and 1,550 Nm</p> <p>Attenuation value: ≤ 0.15 / ≤ 0.5 dB (average / > 99% of all cases)</p> <p>ORL: >70 / > 55 dB (open/closed)</p>

Variants

▲ Example: Use as termination box

▲ Example: Use as cable converter

Package includes

- ▲ 1 x housing with cover
- ▲ Installation instructions, online version

Markings

- ▲ Laser safety symbol
- ▲ Langmatz logo
- ▲ 2 x labelling panels
- ▲ Coupler numbering

ONT size M –

Optical distribution and termination box

The Langmatz ONT size M provides for the management of up to 12 optical fibres integrated in a sturdy polycarbonate cabinet with degree of protection IP 54. It is impressively easy to handle and install, and also meets the high quality standards required for housing, laying, and commissioning sophisticated optical fibre technology. What is more, it is approved and eligible for Germany's National Broadband Funding Programme.

Advantages

▲ Flexibility down to the last detail

- Access and outlet of cables and micro-duct pipes Ø 5, 7, 10 and 12 mm at the bottom left or right as required
- Removable mounting panel for fibre management and coupler/splice protection management
- Slot for 6 couplers
- Possible mounting for splitter
- Accommodates commercially available micro-duct gas stops for micro-duct pipes
- Installation/commissioning/service without the need for special tools
- Various locking mechanism options for the cabinet, with sealing option

▲ Stability and safety – during installation and in operation

- Fibre management via a guide on the mounting panel
- Protected area for safe connection and cable management
- Bending radii maintained using predefined fibre guides
- Outlet cable protected by a silicone seal
- Coupler replacement during ongoing operation

▲ Uses

- Transition to the customer's network
- Single-family home / apartment block and/or corporate sector
- Can be used for a plug connection, fusion splice and coupler

▲ ONT size M closed

Technical data

Designation	ONT size M
Dimensions W x H x D	163 x 242 x 46 mm
Weight	Approx. 500 g
Cabinet material	Polycarbonate
Housing colour	Light grey (RAL 7035)
Cable micropipes	Inlet/outlet for Ø 5, 7, 10 and 12 mm micro-duct pipes
Closing mechanism	Sealable, Phillips-head screw, Torx screw prepared for M4 grooved bolt
Mounting panel	Removable; management of 12 crimp or heat shrink splices (depending on version); also accommodates PLC splitter
Number of fibres	Maximum: 12 optical fibres
Coupler section	▲ 6 x LC Duplex, 6 x SC Simplex, E2000 (with restrictions) or a mixture thereof ▲ Cable outlet (without connector) with strain relief options
Temperature range	-33° to 70°C
Protection rating	IP 54
Degree of shock resistance	IK 06
Quality features	Pigtails/couplers LC, SC APC (green) Ferrule: ceramic, zirconia Fibre type: single-mode ITU-T, G.657A, grade B, E9/125 900 µ Optical parameters of plug connection for 1,310 and 1,550 Nm Attenuation value: <= 0.15 / <= 0.5 dB (average / > 99% of all cases) ORL: >70 / > 55 dB (open/closed)

Package includes

- ▲ 1 x housing with cover
- ▲ 1 x mounting panel
- ▲ 2 x sealing elements for cable outlet
- ▲ Installation instructions – online version

Markings

▲ ONT size M

ONT size M+ – Optical distribution and termination box

The Langmatz ONT size M+ provides for the management of up to 12 optical fibres when using a flexible mounting panel integrated in a sturdy polycarbonate housing specified to degree of protection IP 54. It is impressively easy to handle and install, and also meets the high quality standards required for housing, laying, and commissioning sophisticated optical fibre technology. What is more, it is approved and eligible for Germany's National Broadband Funding Programme.

Advantages

▲ Flexibility down to the last detail

- Ø 5, 7, 10 and 12 mm cable/micro-duct pipe inlet/outlet options top and bottom
- Rotatable mounting panel for fibre management and coupler/splice protection management
- Separate expansion for couplers and pigtails, supported by an individual 6-piece adapter guide with predetermined breaking points
- Removable splice fibre tray for splicing fibres
- Accommodates commercially available micro-duct gas stops for micro-duct pipes
- Series installation of additional housings is possible on both sides for capacity upgrades
- Installation/commissioning/service without the need for special tools
- Various locking mechanism options for the cabinet, with sealing option

▲ Stability and safety – during installation and in operation

- Fibre management via a guide in the housing and in the splice fibre tray
- Protected area for safe connection and cable management
- Bending radii maintained using predefined fibre guides
- Outlet cable protected by a silicone seal
- Coupler replacement during ongoing operation

▲ Uses

- Transition to the customer's network
- Single-family home/multiple-family dwelling and/or corporate
- Can be used for a plug connection, fusion splice and coupler

▲ ONT size M+ closed

▲ ONT size M+ interior view with open splice fibre tray

Technical data

Designation	ONT size M+
Dimensions W x H x D	160 x 285 x 46 mm
Weight	Approx. 600 g
Cabinet material	Polycarbonate
Housing colour	Light grey (RAL 7035)
Cable micropipes	Inlet/outlet for Ø 5, 7, 10 and 12 mm micro-duct pipes
Closing mechanism	Sealable, Phillips-head screw, Torx screw prepared for M4 grooved bolt
Mounting panel	Pivotable 90° depending on the application (4 positions)
Splice fibre tray	Tray of 12 crimp splice protectors / PLC splitter
Number of fibres	Maximum 12 optical fibres
Coupler section	▲ 6 x LC Duplex, 6 x SC Simplex, E2000 or a mixture thereof ▲ Cable outlet (without connector) with strain relief options
Screws	Stainless steel
Temperature range	-33° to 70°C
Protection rating	IP54
Degree of shock resistance	IK 06
Quality features	Pigtails/couplers LC, SC APC (green) Ferrule: ceramic, zirconia Fibre type: single-mode ITU-T, G.657A, grade B, E9/125 900 µ Optical parameters of plug connection for 1,310 and 1,550 Nm Attenuation value: $\leq 0.15 / \leq 0.5 \text{ dB}$ (average / > 99% of all cases) ORL: >70 / > 55 dB (open/closed)

Package includes

- ▲ 1 x housing with cover
- ▲ 1 x mounting panel with 10 mm multiple-fibre tray
- ▲ 2 x sealing elements for cable outlet
- ▲ 14 x serrated screws for fibre strain relief
- ▲ 1 x closing plate for coupler section
- ▲ 1 x sealing for housing installation in series
- ▲ 2 x optical fibre cable/micro-duct pipe fixing elements
- ▲ Installation set for wall installation (screws, dowels, drilling template)
- ▲ Installation instructions (online version)

Markings

- ▲ Laser safety symbol
- ▲ Laser-cut customer logo on cover – on request

ONT size L and size L (spl. dist.) – Optical distribution and termination box

The Langmatz ONT size L optical distribution and termination box is a quality product that combines innovative as well as proven and tested features. It provides for the management of up to 144 optical fibres integrated into a robust, protected polycarbonate cabinet with degree of protection IP 54. It is characterised by its ease of handling, simple installation and flexibility. It also meets the high quality standards required for incorporating, laying and commissioning sophisticated optical fibre technology.

Advantages

▲ Flexibility down to the last detail

- Ø 7, 10, 12 and 16 mm cable/micro-duct pipe inlet/outlet at the bottom left
- Proven fibre management system with organiser and splice fibre trays
- Slot for up to 24 couplers (SC/LC/E2000)
- Accommodates commercial micro-duct gas stop

▲ Application and eligibility for German government aid

- Transition to the customer's network
- Single-family homes, apartment blocks and/or corporate customers are eligible for German government aid
- Can be used for a plug connection, fusion splice and splitter
- Can be used as a splice distributor or splice patch distributor

▲ Stability and safety – during installation and in operation

- Optimum fibre management by a guide in the cabinet and FMS
- Compliance with minimum bending radii
- Outlet cable is protected and organised by outlet seal
- Coupler replacement during ongoing operation

▲ ONT size L closed

Variants

▲ Extended splice patch distributor (144 fibres – 12 couplers)

▲ Standard splice patch distributor (72 fibres – 24 couplers)

Technical data

Designation	ONT size L
Dimensions W x H x D	223 x 320 x 93 mm
Weight	Approx. 1.2 kg
Cabinet material	Polycarbonate (PC)
Housing colour	Light grey (RAL 7035)
Inlet cable / micro-duct pipe	1 x Ø 7, 10, 12, 16 mm
Outlet cable / micro-duct pipe	48 x Ø 1.8 - 3.4 mm 1 x Ø 7, 10, 12 mm
Closing mechanism	Sealable, countersunk seals, Torx screw
Number of fibres and couplers	Standard: maximum 72 fibres & 24 couplers Extension (spl. dist.): maximum 144 fibres & 12 couplers
Coupler section	LC Duplex, SC Simplex, E2000 (restricted) or a mixture thereof
Impact resistance	IK 08
Screws	Stainless steel
Temperature range	-33° to 70°C
Protection rating	IP 54
Diameter of outlet cable	1.8 – 3.4 mm
Fire protection class	UL94 V-2

Package includes

- ▲ 1 x housing with cover
- ▲ 1 x organiser with multiple-fibre tray
- ▲ 2 x sealing elements for cable outlet
- ▲ 1 x fastening screw for strain relief
- ▲ 2 x strain relief panels for Ø 10 mm, Ø 12 mm
- ▲ Installation set for wall installation (screws, dowels)
- ▲ Installation instructions (online version)

Markings

- ▲ Laser safety symbol

Polycarbonate manholes

The efficient alternative to concrete – Modern plastic manholes

At the start of the 1990s, Langmatz began designing polycarbonate manholes. This pioneering achievement laid the foundation for the company's rise to become the European market leader in polycarbonate manholes. They are used as cable draw manholes, telecommunication distribution points, and underground distribution systems worldwide. As secure housings for energy and data lines, they are a central component of infrastructure projects, such as the extension of optical fibre and electricity networks, e-charging stations, and 5G. They impress through their low inherent weight, cost-effectiveness, rapid installation, and structural integrity. This makes them an efficient and versatile alternative to heavy concrete manholes, and enables our customers to use them in a wide range of applications.

High-quality polycarbonate (PC) is the plastic mainly used by Langmatz in its production. PC has excellent rigidity, strength, heat resistance, and hardness, as well as very high resistance to weathering and radiation.

In addition, Langmatz has developed another promising material in a project funded by the Bavarian Research Foundation. As a durable and lightweight material that has proven itself in civil engineering, we have augmented plastic with renewable raw materials, and used it to develop a sustainable manhole system based on wood polymer composites (WPC).

What sets our manholes apart:

- ▲ High-quality plastics and 3D ribFrame technology guarantee durability and resilience of the entire construction up to D 400 and above
- ▲ Thanks to a low intrinsic weight, modular construction and ready-to-install delivery, the manholes can be installed quickly and inexpensively
- ▲ Modular basic kits provide for numerous manhole depths and connection positions for cable installations

Withstands the highest loads – Langmatz 3D-ribFrame technology

We have given a lot of thought to how polycarbonate manholes need to be designed to permanently withstand the highest loads. The QualityBox with its unique 3D-ribFrame® technology has emerged from this intensive development work.

This technology ensures that the manhole body has excellent stability and perfect structural integrity and is thus as durable as the cover – even above D 400.

The advantages of the QualityBox at a glance:

▲ Low inherent weight

- Ease of transport and simple handling
- Quick and inexpensive installation of the polycarbonate manholes
- No heavy lifting equipment required for fitting and installation

▲ Modular design

- One- or multi-section manhole cover
- Hot-dip galvanised steel frame with elastomer contact surface
- PC top frame with internal shuttering walls
- PC frame elements available in a variety of heights and variants
- Base plate (non-slip according to DIN EN 51130-R10) including water drainage openings

3D-ribFrame
designed to resist

Langmatz QualityBox: Easy to handle – flexible to use

We use only high-quality plastics for the production of our manholes. We have integrated predetermined breaking points into the frame elements to ensure the fast and cost-effective installation of the manholes, which can be simply opened for the use of flexible pipe inlets. Modular basic polycarbonate manhole kits enable customers to accommodate numerous manhole heights and connection positions. A wide range of cast-iron, concrete or paveable manhole covers ensures that they can be seamlessly integrated into the cityscape.

European approval – For the complete Langmatz manhole system

The requirements governing the construction principles, testing, labelling, and quality control of manhole covers are regulated in DIN EN 124. A General Technical Approval (AbZ) is all that is required for approval of a manhole in Germany.

By contrast, Langmatz polycarbonate manholes are unique: the entire manhole system is tested, not just the cover. As our manholes comply with the load classes, we have an ETA (European Technical Assessment) which applies to all of our polycarbonate manholes with cover as per DIN EN 124 (B 125 and D 400). This confirms that all the test criteria have been met by Langmatz. That is why our manholes also carry the coveted CE mark.

High-grade body

▲ For all load-bearing elements made from polycarbonate

- Modified polycarbonate (PC)
- Excellent temperature resistance
- Suitable for hot asphalt
- Maximum stability
- High chemical resistance
- Excellent UV and weather resistance
- Can be recycled several times

Variable manhole covers

- ▲ Cast-iron
- ▲ Concrete-lined
- ▲ Paveable
- ▲ Plastic

▲ Cast-iron cover

▲ Steel cover, concrete-lined

▲ Steel cover, paveable

▲ Plastic cover

Modular design

Modular design

Application example: Manhole EK378, clear dimensions 400 x 800 mm

- ▲ Manhole cover for test class B 125 or D 400
- ▲ Manhole cover variants:
 - Cast-iron (approx. 33 kg | B125)
 - concrete-lined (approx. 95 kg | B125)
 - paveable (approx. 87 kg | B125)
- ▲ Hot-dip galvanised steel frame with elastomer pad
 - Weight approx. 23 kg (for cast-iron cover)
- ▲ Polycarbonate top frame with internal shuttering walls
 - Weight approx. 15 kg
- ▲ Polycarbonate frame available in various heights
 - Weight approx. 16 kg
- ▲ Base plate (non-slip according to DIN EN 51130-R10) including water drainage openings
 - Weight approx. 3.5 kg

▲ Modular design:
EK378, clear dimensions 400 x 800 mm
▲ Cast-iron cover

Practical product

- ▲ Continuous height and gradient adjustment
- ▲ Sealing elements for cables without conduits
- ▲ Optimum integration into the surrounding soil
- ▲ Hot-dip galvanised steel frame for mechanical protection of the top edge

Manhole covers

- ▲ Test category DIN EN 124, up to E 600
- ▲ Cast-iron, concrete-lined, paveable
- ▲ Closing mechanisms and company logo

Basic kit

- ▲ Every basic kit and complete manhole includes all the required hole plugs for sealing, levering and locking holes
- ▲ Additional hole plugs can be ordered separately

▲ Basic manhole kit: EK378 with paveable manhole cover

Additional features

Pipe inlets | with predetermined breaking point

- ▲ Pipe inlet via prefabricated predetermined breaking points
- ▲ All predetermined breaking points are closed at the factory
- ▲ Predetermined breaking point easily opened on site
- ▲ Standard pipe inlets:
DN 50 mm | DN 110 mm | DN 160 mm

Pipe inlets | with coupler

- ▲ Always through predetermined breaking points
- ▲ Adapters possible for pipes with a smaller diameter at the predetermined breaking point (Ø 110 mm (Ø 100 mm, Ø 90 mm, Ø 75 mm, Ø 63 mm, Ø 50 mm, Ø 40 mm couplers) or with a very large diameter at the predetermined breaking point (Ø 160 mm (Ø 140 mm, Ø 125 mm, Ø 110 mm couplers))

Pipe inlets | Overbuild with rectangular opening

- ▲ Frames with rectangular openings are used for the retrospective installation of manholes on existing cable routes
- ▲ Appropriate adapter plates are used to integrate the conduits
- ▲ Unused openings are closed with closing plates
- ▲ Example: Adapter plates for the sand-proof connection of various pipes

Closing mechanisms for manhole covers

Standard head styles

- ▲ Hexagonal head
- ▲ Hexagonal socket head
- ▲ LIC-LOCK
- ▲ COLT / TELENET / OTC

Steel frames

are hot-dip galvanised according to DIN EN ISO 1461

Steel frame

Elastomer pad

- ▲ Compensates for minor unevenness
- ▲ Prevents rattling

Height-adjustable manhole

Manholes can be fitted with a height adjustment kit

- ▲ Optimal fit of the upper edge of the manhole to the surface of the ground
- ▲ Continuous height and angle adjustment between the top frame and steel frame as per the installation instructions
- ▲ Height can be adjusted by up to 50 mm

Manhole with water drain

- ▲ All openings in the base plate are used for water drainage

Manhole supplied ready for installation

Based on customer requirements:

1. Frame and base plate
2. Frame
3. Steel frame and cover
4. Top frame

Quality assurance

- ▲ Our quality management system is certified according to DIN EN ISO 9001

Selection criteria

1. Dimensions

- ▲ Clear dimensions | Length x Width

2. Type of manhole cover, included in the basic kit

- ▲ Cast-iron
- ▲ Concrete-lined steel
- ▲ Paveable steel

3. Manhole cover test class acc. to DIN EN 124

- ▲ 15 kN
- ▲ B 125
- ▲ D 400
- ▲ E 600 (on request)

4. Manhole cover closing mechanism

- ▲ Without lock
- ▲ Closure with hexagonal head style
- ▲ Closure with hexagonal socket head style
- ▲ Closure with LIC-LOCK head style
- ▲ Closure with COLT / TELENET / OTC head style

5. Pipe inlets (predetermined breaking points in the required frames)

- ▲ Ø 50 mm
- ▲ Ø 160 mm
- ▲ Ø 110 mm
- ▲ With rectangular openings (overbuild/adapter for D125 and D132)

6. Overall height (results from the selection of frames + basic kit)

- ▲ Overall height: Height of basic kit
+ height of additional frame components
= required overall height

+ Other accessories

- ▲ Height adjustment kit
- ▲ Customer-specific company logo in cover
- ▲ Other diameters using adapters, e.g. for micro-duct pipes
- ▲ ...

=

Manhole with triangular swivelling cast-iron cover, lockable⁴	Order number
Basic kit D 400, COLT/TELENET/OTC locking mechanism	06 428 2202
Accessories for triangular swivelling cast-iron cover, lockable	
Cast-iron cover D 400, 4-piece ⁴	06 428 0281E
Manhole with rectangular swivelling cast-iron cover, lockable⁴	Order number
Basic kit D 400, COLT/TELENET locking mechanism	06 428 2000
Accessories for rectangular swivelling cast-iron cover, lockable	
Locking flap for locking mechanism	70 065 8202E
Cast-iron cover D 400, 4-section, with steel frame ⁴	06 428 0252E
Top frame	06 428 0083E
Manhole with concrete-lined steel cover, lockable⁴	Order number
Basic kit B 125, without lock, locks retrofittable	06 428 1006
Basic kit D 400, hex locking mechanism	06 428 1010
Basic kit D 400, hexagon socket locking mechanism	06 428 1014
Basic kit D 400, LIC-LOCK locking mechanism	06 428 1011
Basic kit D 400, COLT/TELENET locking mechanism	06 428 1015
Accessories for concrete-lined steel cover, lockable	
6 x hex locking mechanism	50 000 6500
6 x hexagon socket locking mechanism	50 000 7500
6 x LIC-LOCK locking mechanism	50 000 8500
6 x COLT/TELENET locking mechanism	50 000 9500
Sealing plug for locking mechanism, black	70 046 0716
Concrete-lined steel cover, B 125, 3-piece	70 045 8675E
Concrete-lined steel cover, D 400, 3-piece ⁴	70 045 8670E
Steel frame	70 042 0180E
Manhole with paveable steel cover, lockable⁴	Order number
Basic kit B 125, without lock, locks retrofittable	06 428 1005
Basic kit D 400, without lock, locks retrofittable	06 428 1038
Accessories for paveable steel cover, lockable	
6 x hex locking mechanism	50 000 6500
6 x hexagon socket locking mechanism	50 000 7500
6 x LIC-LOCK locking mechanism	50 000 8500
6 x COLT/TELENET locking mechanism	50 000 9500
Sealing plug for locking mechanism, black	70 046 0716
Paveable steel cover, D 400, 3-piece ⁴	70 088 2800E
Steel frame D 400	70 088 2820E
For all basic kits	
Top frame, height 140 mm	06 428 0082E
Base plate, height 5 mm	06 428 0054E

Awards

2009
German Materials Efficiency Prize
"From vehicle roof to manhole"

2010
Environmental Prize
"From vehicle roof to manhole"

2011
Bavarian Founder Award
"Succession" category

2012
Intertraffic Innovation Award
"Charging at the light pole"

2013
WPC Innovation Award
"Product Development & Product Design" category

2015
In the Top 3 - GreenTec Awards,
"Recycling & Resources" category

2019
Inno4wood Innovation Award

2021
Top Employer German SMEs 2021

2022
