### **Successful apprenticeship concept at Langmatz**

#### **All graduates join the company after successful IHK examination**

*Garmisch-Partenkirchen, 28 May 2019* – A fine tradition awaits the happy graduates at the end of their vocational training: the presentation ceremony. Five Langmatz apprentices attended the ceremony. As part of the presentation ceremony at the Oberau plant, the former apprentices received a gift from the Board of Management and were released from the apprenticeship on receipt of their diplomas. Due to their good qualifications and the great commitment they showed during their vocational training, all were hired by their respective departments at Langmatz. “We are very proud of you and your achievements and wish you all the best on your further career path,” said the delighted Training Coordinator Angelika Schubert.

A sophisticated apprenticeship concept lies behind the often exceptionally good vocational qualifications obtained by the apprentices of the Garmisch-Partenkirchen-based company. Last year, Langmatz was awarded the distinction of “IHK-Ausbildungsbetrieb 2018 – Hier wurde ein Einser-Azubi ausgebildet” (IHK Vocational Training Company 2018 – A first-class candidate was trained here). This award is presented by the Chamber of Industry and Commerce (IHK) to companies recognised for their dedication to vocational training.

The young colleagues successfully passed their final exams in four different occupations in the winter of 2018/2019 at the IHK for Munich and Upper Bavaria. Regina Stenger and Franziska Wunder completed their vocational training as “industrial clerks”. Franziska Wunder was even awarded the College Prize for her excellent performance at the vocational college. Leonhard Husel is now a trained “industrial mechanic,” Eric Capka a “technical product designer” and Peter Mangold a “tool mechanic”. Due to his outstanding achievements in the final exam, Peter Mangold may apply for a further educational

scholarship at the IHK. These scholarships are only available to apprentices who achieve at least 87 points in the final exam (corresponding to a grade of 1.9).

As one of the largest employers and vocational training companies in the district of Garmisch-Partenkirchen, Langmatz GmbH has been training young professionals for over 50 years. The innovative company develops, produces and markets technical system solutions for the power engineering, telecommunication and traffic engineering sectors. Langmatz is keen to actively promote and train its own young talent - currently in ten different recognised occupations requiring formal training and five dual study programmes.
